Subject: Stormwater Vault Sediment Sampling at King Co. Intl. Airport

Hi Fritz;

I just received word from Rick Renaud regarding the accounting system at KCIA. They are on ARMS and this would be considered a capital project. I still need to get a project number from Rick.

We will collect eight (8) sediment samples collected from the bottom of stormwater vaults on KCIA property. We will need the samples analyzed for the following parameters:

- 8082 - PCBs (1 week TAT)
- 8270 - PAH/Phthalates (normal TAT)
- Metals – As/Cu/Pb/Hg/Zn (normal TAT)
- Total Organic Carbon (normal TAT)
- NWTPH-Dx - Total Petroleum Hydrocarbons (diesel- and oil-range) (normal TAT)

I am going to provide a scope of work/cost estimate to Rick for this project. Please let me know the analytical costs so I can put this into my cost estimate.

Also, it would be helpful to know the sample container requirements.

Thanks,

Bruce
